

MEET ANGEL

Created with travel agent expertise to showcase the power of natural, action-oriented conversational dialogue.

MEET ANGEL

INPRIS HUMAINS

Introducing Inpris HumAIns, the revolutionary human-like conversational AI platform that provides autonomous AI agents for customer service and smart assistance, completely changing the way businesses interact with their customers. With their unique ability to converse naturally and perform a wide range of tasks and services—previously only conducted by humans—Inpris HumAIns are transforming the service world.

HumAIns utilize advanced Generative AI technology to automate business processes and elevate customer experience.

HumAIns galvanize your team with powerful capabilities and deliver a VIP experience to every customer.

D2A TECHNOLOGY

Inpris' innovative **Dialogue to Action™** (D2A) technology is leading the way in solving the problem of unreliable and inaccurate Generative AI, while bringing conversational AI to a human level.

With D2A, Inpris' HumAIns can converse with users and perform tasks that were previously only done by humans. The cognitive architecture of D2A includes fine-tuned large language models and advanced algorithms that enable clear reasoning, decision-making, and self-monitoring. Additionally, Inpris' action modules seamlessly integrate with third-party applications, allowing real-time data retrieval and conversations which lead to concrete, targeted actions.

Say goodbye to the headaches of unreliable and inaccurate Generative AI and limited, unscalable conversational AI, and say hello to Inpris' D2A technology – the future of the service world.

HUMAINS™ REVOLUTION
